BOPP FILMS

Label

We offer a variety of high-quality BOPP films for labeling applications.

In Mold Label (IML)

- o Different appearances: transparent, matt, white-voided, white, metalized
- o Different types: high-yield orange peel, high-stiff satin finish, glossy and matt finish effect

Self-Adhesive Label (SAL)

- o Primer coated film for better UV printing
- o Different appearances to be used as face stock material

Wrap Around Label (WAL)

- o Different appearances film to be used in high speed machines

For More Information

Adhesive Tape Application

Specially designed crystal-clear film, suitable for both water-based acrylic and hotmelt applications.

For More Information

CPP FILMS

CPP Films

Polfilm has recently expanded their product portfolio by adding CPP films.

Cast extruded film with excellent machinability and good quality, such as

- o Transparent sealable
- o Metalized

For More Information

LAMINATION ADHESIVE

Lamination Adhesive

With the aim of providing total solutions to customers, our group supplies two-component solvent-less adhesives for various types of flexible packaging.

- o General purpose performance
- o High performance
- o Medium performance

For More Information

PE STRETCH FILMS

PE Stretch Films

Noghre Fam Poush as manufacturer of PE stretch films, providing the best packaging solutions for specific applications.

- o Machine stretch film
- o Hand stretch film
- o Silage stretch film
- o Cling film

For More Information

Coreless – Pre-Stretch

All stretch roll grades of NFP can be supplied without a paper core, and also in pre-stretch grade.

This helps consumers with easy handling for furniture and hand-use packaging.
